POLICY NUMBER: **FP-FIN-001**

FIXED ASSET

ACCOUNTING POLICY

The purpose of this policy is to provide comprehensive guidance regarding Hilton Worldwide Holdings, Inc.'s ("Hilton's") accounting for fixed assets in accordance with US Generally Accepted Accounting Principles ("GAAP") Accounting Standard Codification ("ASC").

POLICY STATEMENT

Hilton owns a wide range of fixed assets including, but not limited to: land, buildings & building improvements, leasehold improvements, and furniture, fixtures & equipment ("FF&E").

SCOPE

The scope of the policy extends to all fixed assets held by Hilton, including fixed assets at leased properties for which Hilton is deemed the owner of the improvements. The characteristics of fixed assets are:

- Fixed assets are acquired for use in operations and not for resale.
- They have a useful economic life that exceeds 1 year.
- They possess physical substance.
- They extend the useful economic life of an existing asset.

This policy also covers the subsequent measurement of finance lease right-of-use ("ROU") assets.

The following costs should **not** be capitalized as fixed assets:

- Items with a unit cost of less than \$1,000, except for bulk purchases where the unit price exceeds \$50, and the total purchase exceeds \$1,000.
 - For example: purchase of a television at a cost of \$385 would not be capitalized since the television is less than \$1,000. The purchase of ten televisions with a total cost of \$3,850 would be capitalized as the total cost is in excess of \$1,000.
- Repairs of existing equipment, including component parts, which maintain an asset rather than extend the useful life.
 - For example: replacement of the main roller in the laundry ironer at a cost of \$3,200 would be capitalized since the cost of the roller is in excess of \$1,000 and the useful life is extended.
- Rearranging, remodeling, or moving existing equipment unless part of a major renovation. To be capitalizable, a renovation must extend the useful life of an asset, increase the capacity of the asset, or improve the efficiency or safety of the asset.
- Landscaping, including the cost of plants and trees and clearing, grading, and planting hotel grounds.
- Operating equipment including linen, chafing dishes, coffee urns, silver, and china, even if the item's unit cost exceeds unit cost thresholds.
- General purpose painting (unless part of initial construction or major renovation).
- Pool cleaning.
- Power washing the exterior of a building.
- Initial Project Approval Requests ("PARs").
- Operating Expenses.
- Inventory.
- Resurfacing parking areas and painting lines in parking lots (e.g., slurry and tarring).
- Pre-opening costs (e.g., ceremonial costs or ribbon cutting).

Expenditures which do meet the characteristics included above should be expensed in the period incurred.

APPLICABILITY

This policy applies to all Finance personnel, as well as Asset Management and Legal.

EXCLUSIONS/ EXCEPTIONS

Managed Hotels (including Managed Timeshare Resorts)

Certain hotel owners have approved fixed asset policies differing from this policy and, as a result, those hotels must adhere to their respective Management Agreements ("MAs") and any specific fixed asset policies approved by their hotel owners.

To the extent the MA is silent on accounting for fixed assets and the hotel owner did not specify a specific methodology for accounting for fixed assets, the managed hotel must follow this policy.

Additionally, to the extent the hotel owner of a managed hotel requests Hilton to maintain and account for fixed assets on their behalf, the managed hotel must follow this policy.

Intangible Assets & Software

Refer to **FP-FIN-017—Intangible Assets Accounting Policy** for guidance on the appropriate accounting. Examples of intangible assets include but are not limited to: Management & Franchise Contracts, Brands, Goodwill, and Other Identified Intangible Assets. For software, refer to **FP-FIN-016—Internal-Use Software, Hosting Arrangements and Website Development Accounting Policy** for further guidance.

FF&E at Lease Properties Where Hilton does not Own the Improvements

Refer to **FP-FIN-007—Lease Accounting Policy** for guidance.

Operating and Finance Lease ROU Assets

Refer to **FP-FIN-007—Lease Accounting Policy** for guidance on the appropriate accounting for initial recognition and measurement of operating and finance lease ROU assets and the subsequent measurement of operating ROU assets.

AUTHORIZATIONS

Required Consultations with Technical Accounting (“TA”)

TA must be notified to determine the appropriate accounting for all of the following situations:

- A building or renovation project involves demolishing all or part of an existing building.
- Leasehold improvements are made to a leased space (e.g., partition walls or ceilings) that are funded or partially funded by the lessor (i.e., landlord) in conjunction with a new lease or amendment.
- Proposed sales, disposals or acquisitions of owned hotels or investments in ventures or similar entities, and/or the exit from leased properties.
- Changes to or requests for using useful lives in excess of the lease term (or remaining lease term) at leased properties.
- Certain exterior painting and caulking when the project is part of a broader capital plan. Painting and caulking must encompass a majority of the building to be considered building and building improvements.
- Hilton receives assets used to provide services upon termination of a service agreement.
- Assets are acquired in a non-monetary exchange.

Additional Consultation Requirements

The following consultations/approvals are required related to fixed assets:

- Any owned, leased, or consolidated JV hotel not in compliance with this policy must obtain a policy waiver in accordance with **FP-OPSFIN-160—Policy Waivers**.
- Any managed hotel without an owner approved fixed asset policy and not in compliance with this policy must obtain a policy waiver in accordance with **FP-OPSFIN-160—Policy Waivers**.
- Any fixed assets at a corporate location that are not accounted for in compliance with this policy must obtain approval from the RTR Global Process Lead.

INITIAL RECOGNITION AND MEASUREMENT

All fixed assets are initially recognized and recorded at cost on the balance sheet. This amount includes all costs to acquire an asset and all costs required to prepare an asset for its intended use (e.g., freight, installation, testing, sales taxes, or interest during construction).¹ Interest costs related to installment purchase contracts or capitalized leases are not part of the cost of the asset and should not be included.

A construction-in-progress (“CIP”) account must be used to accumulate project construction costs for all assets that have not yet been placed in service. The DOF, Controller, FM, or related team responsible for the fixed asset accounting must hold

¹ ASC 360-10-30-1, Historical Cost Including Interest

recurring meetings or discussions with the Architecture and Construction Team (“A&C”) or other departments to ensure the appropriate determination of accumulated CIP, including any amounts to be accrued, and the in-service date for completed projects.

The DOF, Controller, FM, or related team responsible for fixed asset accounting is also responsible for reviewing the CIP account monthly to ensure the costs of completed projects are being transferred to the appropriate fixed asset accounts timely and that depreciation commences as of the date the assets are placed in service.

See **Appendix II** for each of Hilton’s major asset categories and examples of typical costs under each category.

SUBSEQUENT MEASUREMENT

a. Depreciation

Depreciation is a method for allocating the cost of an asset to the income statement over its estimated economic life, as opposed to its physical life.² Hilton computes depreciation using the straight-line method as it represents the most systematic and rationale way of matching the cost of the fixed assets to their expected use. Salvage value is considered only in rare instances where it can be determined with reliability (e.g., certain capital leases might contain a provision for a “guaranteed residual or salvage value”).

Useful Lives

While the following lives are to be used for depreciating assets, there may be certain instances where another useful life is more appropriate for a particular asset or hotel. See the **Authorization** section for approvals required for deviations.

² ASC 360-10-35-4, Property, Plant, and Equipment, Depreciation

<u>Fixed Asset Category</u>	<u>Useful Life</u>
Land	Never depreciable
Buildings	40 years
Building and Land Improvements	8 - 40 years depending on frequency of replacement for the particular addition. See Appendix III for suggested lives.
Finance Lease ROU Asset	The shorter of the lease term of the useful life of the underlying asset. If at the end of the lease term the lease transfers ownership of the underlying asset to the lessee or the lease has a purchase option the lessee is reasonably certain to exercise, the useful life of the underlying asset should be used. ³
Leasehold Improvements	The shorter of the building's or building improvements' useful life, or the remaining lease term. ⁴
FF&E	3 - 8 years On average, hotels undergo a soft refurbishment every 8 years. Hotels can assign an 8-year useful life for most FF&E that would be replaced as part of the soft refurbishment. Hotels can also assign an estimated useful life for each specific FF&E asset that is within the range of 3 to 8 years, depending on each specific asset's intended use and expected useful life at the hotel.
Computer Equipment – Hardware	3 - 5 years Refer to FP-FIN-016—Internal-Use Software, Hosting Arrangements and Website Development Accounting Policy for further capitalization guidance
Automobiles & Trucks	5 years
Other Equipment (planes, boats, etc.)	Considered on an individual bases based on the individual facts and circumstances of the asset.

In-Service Date and Depreciation Calculation

An asset starts depreciating on the date it is placed in-service ("in-service date"). For example, for a room renovation, the room's in-service date is the date it becomes available for guests to occupy. The in-service date does not necessarily align with the date the asset was acquired if an asset is not available for immediate use (e.g., asset is part of a larger renovation project). The accounting team should obtain input from the project manager regarding an asset's in-service date. For assets placed in service immediately after receipt, the in-service date is the date the asset was received at the hotel and the hotel started to use the asset. This date could be different than the invoice date.

Straight-line depreciation is calculated based on the asset's estimated useful life. A full year's depreciation is calculated by dividing the cost of the asset by the asset's estimated useful life in years. The basic formula is as follows:

$$\text{Annual Depreciation Expense} = \frac{\text{Fixed Asset Cost}}{\text{Estimated Useful Life (Years)}}$$

Depreciation expense is recognized on a monthly basis for all assets, beginning in the month the asset is placed in service. The monthly depreciation expense is calculated as 1/12 of the annual depreciation expense.

For a newly constructed building or a major renovation of an existing building, depreciation commences as of the date the asset is placed in service. If only a portion of the building that was constructed or renovated is opened, the monthly depreciation expense is pro-rated based on the percentage of the project rooms made available to the public as of that date. The pro-rated rooms are calculated as:

$$\text{Pro – rated Project Rooms} = \frac{\text{Project Rooms Made Available to Public}}{\text{Total Number of Rooms in Project}}$$

Once the project is complete, depreciation will commence on the remaining section of the building.

Subsequent Change in Fixed Asset Useful Life

Changes to the useful life of an asset are driven by a change in the asset’s specific facts or circumstances. Additionally, certain jurisdictions may require an annual review of the economic life of an asset which could result in change in the useful life. A change in the useful life is a change in an accounting estimate and is accounted for on a prospective basis. The new depreciation expense is calculated by dividing the current net book value (“NBV”) of the asset by the asset’s new remaining useful life. No retrospective adjustment is made to previously recognized depreciation expense.⁵

b. Assets Held for Sale

No depreciation is recognized on assets classified as held for sale.⁶ Refer to **FP-FIN-012—Assets Held for Sale and Discontinued Operations Accounting Policy**.

c. Impairment of Fixed Assets

Fixed assets are impaired when the fixed asset’s NBV exceeds its fair value. Impairment only occurs when this amount is deemed not recoverable.⁷ Refer to **FP-FIN-033—Impairment Accounting Policy** for details around Hilton’s impairment process.

When an impairment loss is recognized, the adjusted NBV becomes the new cost basis.⁸ This new cost basis is depreciated on a straight-line basis over the remaining useful life of the fixed asset. Restoration of a previously recognized impairment loss is prohibited.

DERECOGNITION

a. Disposals and Write-offs

Once an asset is fully depreciated, it will remain on the fixed asset sub-ledger until it is ultimately disposed of (e.g., sold or removed from the hotel). If a fixed asset with an NBV is disposed of other than by sale, the remaining NBV is written down to zero through the recognition of additional depreciation expense equal to the remaining NBV. The gross cost and accumulated depreciation for the fixed asset are then removed from the fixed asset sub-ledger.

When a fixed asset is sold, the gain or loss on sale is calculated by comparing the amount received for the fixed asset to the NBV. Any gain or loss is posted to the income statement in the period the sale takes place.⁹ At the time of the sale, the gross cost and accumulated depreciation of the fixed asset is removed from the fixed asset sub-ledger. Refer to Hilton’s **FP-FIN-012—Assets Held for Sale and Discontinued Operations Accounting Policy**.

Renovation costs are generally aggregated as one capital expenditure project (e.g., “Second floor refurbishment”) when completing a major renovation of an existing hotel area or a betterment or addition to the hotel (e.g., the conversion or repurposing of a space). When an individual fixed asset is disposed and cannot be separately identified from the aggregated single capital expenditure project, an allocation is performed to determine the appropriate balance to write-off. The allocated amount is removed from the gross cost and accumulated depreciation in the fixed asset sub-ledger. If the fixed asset being disposed has not reached the end of its useful life, and therefore, is not fully depreciated, the remaining NBV of the fixed asset being disposed is written down to zero through the recognition of additional depreciation expense.

FINANCIAL STATEMENT LINE ITEMS AFFECTED

Note: The following section addresses the financial statement line items affected by the accounting for routine transactions covered by this policy. For all transactions that require a consultation with TA, please refer to the guidance provided by TA regarding the appropriate financial statement line items affected by the transaction.

<u>Transaction</u>	<u>Affected</u>		
	Balance Sheet Line Item	Income Statement Line Item	Cash Flow Statement Section
Initial capitalization of fixed assets recorded at cost on the balance sheet	- Property and equipment, net (debit) - Cash and cash equivalents or Accounts payable, accrued expenses and other (credit)	- N/A	- Investing Activities (Outflow)
Recognition of depreciation based on gross cost divided by the estimated useful life.	- Property and equipment, net (credit)	- Depreciation and amortization (debit)	- Operating Activities (reconciling item to net income)
Write-off of a fixed asset (disposal)	- Property and equipment, net (debit & credit)	- Depreciation and amortization (debit)	- Operating Activities (reconciling item to net income)
Write-off of a fixed asset (sold for gain or loss)	- Property and equipment, net (debit & credit) - Cash and cash equivalents or Accounts payable, accrued expenses and other (debit)	- Gain (loss) on sales of assets, net (debit or credit)	- Investing Activities (Inflow)
Impairment of a fixed asset:	- Property and equipment, net (credit)	- Impairment loss (debit)	- Operating Activities (reconciling item to net income)

APPENDICES

Appendix I: Fixed Asset Sub-Ledger Componentization

Use the following as a guide for the detail expected to be included when coding fixed asset additions into the fixed asset sub-ledgers. This should be the first step in analyzing what the expense relates to (e.g., building, leasehold improvement, or FF&E). The descriptions below are examples of labels expected to be reflected within the fixed asset sub-ledger when first identifying and recording the capital expenditure.

Buildings and Building Improvements

- Core building structure
- Roofing
- Guestrooms
- Food and beverage outlets and kitchens
- Lobby
- Corridors
- Ballrooms
- Meeting rooms
- Back-office space
- Leisure areas (e.g., gym, pool, sauna, or spa)
- Parking garages
- Elevators
- HVAC
- Other mechanical equipment
- Outdoor spaces

FF&E

- Guestrooms
- Food and beverage outlets and kitchens
- Lobbies
- Corridors
- Ballrooms
- Meeting rooms
- Back-office space
- Leisure areas (e.g., gym, pool, sauna, or spa)
- Outdoor spaces

Leasehold Improvements

- Roofing
- Guestrooms
- Food and beverage outlets and kitchens
- Lobbies
- Corridors
- Ballrooms
- Meeting rooms
- Back-office space
- Leisure areas (e.g., gym, pool, sauna, or spa)
- Parking garages
- Elevators
- HVAC
- Other mechanical equipment
- Outdoor spaces

Appendix II: Examples of Capitalizable Fixed Assets

Below are Hilton's major asset categories and examples of typical costs to include.

Land and Land Entitlements

Costs incurred to acquire land or land entitlements should be capitalized as part of the acquired land. The following are examples of costs that should be capitalized as part of the cost of the land:

- Land purchase price
- Real estate commissions paid by purchaser
- Legal fees if expenses exceed \$75k
- Title insurance policy
- Real estate surveys
- Cost of option if option is exercised
- Demolition of old buildings on land to prepare for intended or alternate use
- Past-due real estate taxes paid by purchaser at the time of purchase
- Interest during construction (see **FP-FIN-023—Capitalized Interest Accounting Policy** for interest capitalization guidelines)

Buildings

Costs incurred to acquire or construct a building should be capitalized as part of the cost of the building. The following are examples of costs that should be capitalized as part of the cost of the building:

- Cost of building construction costs
- Building permits
- Plans and blueprints
- Site preparation, including grading and excavation
- Sidewalk or paving replacements
- Past-due real estate taxes paid by purchaser at the time of purchase
- Architectural and engineering fees
- Temporary facilities used during construction
- Interest during construction (see **FP-FIN-023—Capitalized Interest Accounting Policy** for interest capitalization guidelines)
- Legal fees if expenses exceed \$75k
- Real estate taxes during the construction period
- Other costs incurred solely because of acquiring or constructing the building
- Environmental studies (see **FP-FIN-025—Asset Retirement Obligations Accounting Policy** if an environmental liability is needed because of the study)
- In-house labor (see **FP-FIN-002—Capitalization of Employee Labor Costs Accounting Policy** for capitalization guidelines)

Leasehold Improvements (Leased Hotels) and Building Improvements (Owned & Managed Hotels)

Leasehold improvements are structural improvements or changes to leased assets and typically revert to the lessor when the lease ends. In some cases, the lease will include provisions requiring Hilton to remove or dismantle any leasehold improvements made to the leased property. Refer to **FP-FIN-025—Asset Retirement Obligation Accounting Policy** if the lease includes these types of provisions.

Costs incurred to build out a leased space or improve a building should be capitalized as leasehold improvements or part of the cost of the building. The following are examples of costs that should be capitalized as leasehold improvements or part of the cost of the building:

- Life safety systems
- Asbestos removal costs
- Central air conditioning systems
- Elevator or escalator modernization
- Changes to office and store rental space, including the conversion of guestrooms to rental space
- Renovation or construction involving the movement of doors, ceilings, or walls considered to be permanent changes to the building
- Construction of areas for ice and vending machines
- Garbage, linen, and paper chutes
- Floor re-tiling
- New roofs
- Installation of acoustical ceilings
- Swimming pools
- Window replacements
- New moveable doors/walls in public rooms
- Replacement of hot and cold-water risers
- Replacement of other structural plumbing
- Changes to cooling towers or chilled water coils
- Changes to electrical wiring, panels, transformers, or risers
- Boiler conversion or replacement
- Installation of new sound system or an extensive revision to an existing system
- Installation of hard-wired smoke detectors
- Outdoor fencing
- Outside lighting
- Electronic lock systems
- Tuck-pointing of a section of the building exterior
- Signage
- Emergency lighting
- Building structure and infrastructure cladding
- Millwork (e.g., baseboards, molding, attached shelving, or chair rails)
- Custom furniture and equipment included in the millwork contract
- Faucets
- Sanitary ware
- Smaller plant pumps
- In-house labor (see **FP-FIN-002—Capitalization of Employee Labor Costs Accounting Policy** for capitalization guidelines)

FF&E

The following are examples of costs that should be capitalized as part of the cost of FF&E:

- Cost of furniture or equipment
- Freight
- Import duties
- Sales or use taxes on purchase
- Installation by outside labor
- HSM fees, if applicable
- Reupholster charges
- Drapes
- Carpets, including padding
- Housekeeping equipment
- Vending machines
- Ice machines
- Kitchen and food working equipment
- Bar and bar working equipment
- Office furniture
- Computer equipment
- Refrigeration equipment
- Tools and other equipment
- Audio visual equipment
- Window air conditioning units
- Movable lighting fixtures
- Laundry machinery and working equipment
- Automobiles and trucks
- Gaming equipment (e.g., slot machines)
- Banquet equipment (e.g., tables and chairs)
- Wall coverings incurred as part of a remodeling project
- Revisions to dining rooms and bars incurred as part of a remodeling project
- Conversion of walk-in freezers
- Model rooms
- Artwork
- New marquees
- In-house labor (see **FP-FIN-002—Capitalization of Employee Labor Costs Accounting Policy** for capitalization guidelines)

Appendix III: Useful Lives

Use the following as a guide for determining the useful lives of assets. The useful life for leasehold improvements or FF&E used in a leased space are limited to the lesser of the remaining term of the lease and the useful life of the leasehold improvement or FF&E.

Buildings, Building Improvements, and Leasehold Improvements

- 40 Years
 - Construction involving the movement of ceilings or walls
 - Building structure and infrastructure cladding
 - Construction of pitched roofs
 - Asbestos removal costs
 - Garbage, linen, and paper chutes
 - Construction of areas including new structures, layouts, and partition walls
 - Swimming pool concrete bottoms
 - Replacement of hot and cold-water risers
 - Replacement of other structural plumbing
 - Changes to electrical wiring, panels, transformers, or risers
 - Millwork (e.g., baseboards, molding, attached shelving, or chair rails)
- 20 Years
 - Window replacements
 - Outdoor fencing
 - Life safety systems
 - Central air conditioning systems
 - Elevator or escalator modernization
 - Construction of flat roofs
 - New movable doors or walls in public spaces
 - Changes to cooling towers or chilled water coils
 - Boiler conversion or replacement
 - Installation of a new sound system
 - Extensive revisions to an existing sound system
 - Electronic lock systems
 - Doors
- 15 Years
 - Signage
 - Outside lighting
 - New floor
 - Wall re-tiling
 - Installation of acoustical ceilings
 - Swimming pool aluminum bottoms
 - Installation of hard-wired smoke detectors
 - Emergency lighting
 - Faucets and sanitary ware
 - Smaller plant pumps
 - Custom furniture and equipment included in millwork contracts
- 10 Years
 - Tuckpointing of sections of the building exterior
 - Certain exterior painting and caulking projects when part of a broader capital plan
 - Requires consultation with TA

FF&E

- 3 to 8 Years
 - Cost of furniture
 - Cost of equipment
 - Freight
 - Import duties
 - Sales or use taxes on purchases
 - Installation by outside labor
 - HSM fees, if applicable
 - Reupholster charges
 - Drapes
 - Carpets, including padding
 - Electrical fixtures
 - Televisions
 - Radios
 - Housekeeping equipment
 - Vending machines
 - Ice machines
 - Kitchen and food working equipment
 - Bar and bar working equipment
 - Office furniture
 - Refrigeration equipment
 - Tools and other equipment
 - Audio visual equipment
 - Window air conditioning units
 - Movable lighting fixtures
 - Laundry machinery and working equipment
 - Gaming equipment (e.g., slot machines)
 - Banquet equipment
 - Wall coverings when part of a remodeling project with costs greater than \$1k
 - Revisions to dining rooms and bars incurred as part of a remodeling project
 - Conversion of walk-in freezers
 - New marquees
 - Automobiles
 - Trucks
 - Artwork
- 3 to 5 Years
 - Computer equipment - Hardware
