POLICY NUMBER: FP-OPSFIN-112

General Cashier's Office, Main Vault, & Drop Safe Security

This policy provides guidance for the security of the General Cashier's office, the main vault, and the drop safe.

POLICY STATEMENT

The General Cashier's Office is typically where the main vault is stored and General Cashier duties are performed. The main vault should hold the General Cashier's issued funds as well as pending bank deposits, etc. The drop safe provides for a secure space for cashier's to drop their daily deposits or due backs.

APPLICABILITY

All Owned & Operated Hotels (including Shared Service Centers supporting these hotels).

EXCLUSIONS/EXCEPTIONS

No exclusions.

A. GENERAL CASHIER'S OFFICE CONTROLS

- 1) Access to the General Cashier's (GC) office must be restricted to the General Cashier only (where an office exists).
- 2) Back-up access (key, code, or key card) to the GC office must be stored in a secure location either by the Finance Leader, Operations Leader, or Security. If a back-up does not exist, the key or key card must remain on property at all times (i.e., checked in and out from Security or the Finance Leader).
- 3) A log for the back-up key, code, or key card must be in place to document who used the key, code, or key card. An electronic key card system with an audit trail may replace the log.
- 4) The GC's office should be equipped with a panic alarm or the GC should be provided with an alternative means to call for help in case of emergency (i.e., a pager, etc.).
- 5) If the GC's office is accessed by a combination, each time the GC goes on leave for an extended period of time (i.e., one week or more) the combination must be changed while they are gone and again upon their return.
- 6) If the GC's office is accessed by a key or key card, each time the GC goes on leave for an extended period of time (i.e., one week or more) the key or key card must be turned in to Security or the Finance Leader prior to leaving.

B. MAIN VAULT CONTROLS

- 1) The main vault should be located in the GC's office or a secure area and must be fireproof. The main vault must be secured/bolted to the wall and/or the floor, where possible.
- 2) Under no circumstances can anyone other than the General Cashier have access to the main vault.
- 3) Irrespective of the type of combination or key used to access the main vault, the GC should be the only Team Member with the means to access the vault.
- 4) The back-up access to the main vault must require both the Finance Leader and the Operations Leader to open the safe. This can be accomplished by splitting the combination or splitting the key and combination. Segregation can also be achieved by splitting the key to the main vault and the key to the GC's office (if main vault is only secured by a single key).

- 5) The combination or back-up key must be placed in a tamper-proof, sealed bag or envelope which once opened can't be resealed. The bag or envelope must be dated and signed by the GC. The bag or envelope must be issued to and secured by the Operations Leader or Finance Leader. The secured location is at the discretion of the Operations Leader or Finance Leader. The combination or back-up key is to be provided to the replacement GC when the primary GC is on extended leave. Immediately upon return of the primary GC the main vault combination (if applicable) must be changed. The sealed bag or envelope must be reissued to and secured by the Operations Leader or Finance Leader.
- 6) The main vault must be counted at time of surrender and the count should be documented and signed by both the incoming and outgoing cashier. The count of the main vault will be submitted to the Finance Leader or Operations Leader for approval and record retention.

C. DROP SAFE CONTROLS

- 1) The drop safe should be located in a secure area and must be fireproof. The drop safe must be secured/bolted to the wall and/or the floor, where possible.
- 2) Irrespective of the type of combination or key used to access the drop safe, two Team Members are required to open the safe. Typically one of the two Team Members with access to the drop safe is the GC.
- 3) For combination only drop safes, the split combination should be limited to as few Team Members as possible.
- 4) For combination and key drop safes, the key must be secured (i.e., checked out from Security, retained with the Finance Leader, etc.).
- 5) Back-up access to the drop safe must require both the Finance Leader and the Operations Leader to open the safe. This can be accomplished by splitting the combination or splitting the key and combination.
- 6) The combination or back-up key must be placed in a tamper-proof, sealed bag or envelope which once opened can't be resealed. The bag or envelope must be dated and signed by the GC and required witness. The bag or envelope must be issued to and secured by the Operations Leader or Finance Leader. The secured location is at the discretion of the Operations Leader or Finance Leader. The combination or back-up key is to be provided to the replacement GC when the primary GC is on extended leave. Immediately upon return of the primary GC the drop safe combination (if applicable) must be changed. The sealed bag or envelope must be reissued to and secured by the Operations Leader or Finance Leader.

DEFINITIONS

TERM/ACRONYM	DEFINITION
Main House Fund	The General Cashier's issued house fund.
Main Vault	The safe that secures the General Cashier's house funds
Drop Safe	A safe where Team Members can securely drop their daily deposit or due backs.
Finance Leader	Ranking Accounting / Finance representative for the property (i.e., DOF, Controller, or Finance Manager).
