SOP NUMBER: SOP-OPSFIN-212APAC

Banking Portal

This Standard Operating Procedure provides guidelines for supplier setup and maintenance in banking portal, payment upload and approval, as well as guidance around banking portal user access management.

APPLICABILITY

All Owned & Operated Hotels (including Shared Service Centers supporting these hotels)

EXCLUSIONS/EXCEPTIONS

No exclusions.

Supplier Banking Information Set-up

**This section only applicable to hotels which the supplier is set up within the banking portal*

- 1) A supplier can only be set up in the banking portal after it is set up in GL system with New Supplier Form” (or equivalent) complete and approved.
- 2) The supplier set up in the banking portal must then be verified by an independent TM (other than the TM input the supplier information into banking portal). It includes a verification of all details to the New Supplier Form and supplier set up in GL system.
- 3) A system report summarizing all additions and changes to suppliers must be produced monthly. This report must be reviewed, signed, and dated by the Finance Leader to confirm that all updates are accurate and approved.

Payment Upload and Approval

- 1) Payment approver needs to review the payment data if there is any opportunity for human intervention in the process of data extraction from GL system to banking portal, including manual input/upload of payment data into banking portal.
- 2) Payment must be approved by Finance Leader and Operations Leader before being released.

User Access Management

- 1) Any change in users must be processed on a timely basis.
- 2) User access rights of banking portal must be reviewed quarterly by an independent TM who is not having the administrator right with evidence of review retained. Refer to UAR Guide for more guidance.
- 3) User access report must include the detailed access rights of each user/role.

Checking Points

Checking Points	Action to be taken
Is the payment data editable after being extracted from GL system and before being uploaded to banking portal?	If yes, a thorough review on the payment data in banking portal needs to be performed by payment approver before payment release
Is the payment data editable after being uploaded to banking portal?	
Is the payment data in banking portal editable after being approved by GM and/or DOF and before payment being released?	If yes, review the banking portal setting or user access to disable such function in banking portal

Can payment be released without approval by two TMs?	This can only be allowed if and only due to the system limitation. In such case it requires an approved policy waiver and payment data uploaded to the banking portal needs to be reviewed by two TMs before release of payment
Can the same TM initiate and approve payment?	If yes, remove access rights to initiate payment from approver

***Given the different context in different markets, the banking arrangement and user accesses must be reviewed in detailed to ensure segregation of duties, proper payment approval and mitigation of risk.**
