POLICY NUMBER: **FP-RM-016**

EMEA and APAC TRAVEL SAFETY & SECURITY

This policy contains information and procedures covering pre-travel preparation; research on destinations; American Express and Concur booking systems; and advice on travel plans, delayed or cancelled flights, fitness to travel, medical information, communication support and emergency evacuation plans.

POLICY STATEMENT

This Policy supports Team Members traveling for business. This policy aims to enhance the security awareness, location-specific, and personal safety information we provide Team Members, while simultaneously maintaining business continuity and corporate reputation, and minimizing criminal and civil liability risks and occurrences. Each section provides information about Team Member and company responsibilities.

APPLICABILITY

This Policy applies to:

- All corporate Team Members engaged in business travel outside their home country.
- General Managers, Hotel Managers, regional hotel teams and any other hotel-based Team Member conducting business travel outside of their home country at Hilton properties and corporate offices in Europe, Middle East and Africa, and Asia Pacific.

EXCLUSIONS/EXCEPTIONS

None

POLICY DETAILS

A. Pre-Travel Preparation

i) USE OF GLOBAL GUARDIAN

As part of on boarding, you will receive information about Global Guardian, our global partners for travel safety and security.

All Team Members are encouraged to download the Global Guardian App onto their smart phones. Visit the [Global Guardian Lobby Page](#) for app download instructions.

Global Guardian provides the following services:

24/7 Operations Center

24/7 operations center staffed by travel safety experts, with access to:

- Travel security advice via phone or email
- Consular advice via phone or email
- Pre-trip non-custom travel intelligence
- Emergency translation and interpretation services
- Emergency response, routine and on-demand medical support services (see below)

Routine Medical Support Services

- Real-time emergency medical consultation via phone or video call with no appointment necessary for emergency situations
- International medical and dental referrals to ensure access only to vetted health care facilities with high standards
- Emergency cash transfer where required (and approved by Hilton)
- Travel and medical trip intelligence providing up-to-date information on vaccinations, health risks, travel restrictions and advice and weather conditions for destinations worldwide
- Emergency message relay and emergency translation assistance

- Emergency prescription replacement service
- Emergency transport of immediate family members of medically evacuated Team Member (prior Hilton approval required)

On-Demand Medical Support Services

In addition to the routine medical support services, the following on-demand services can be arranged at cost with Hilton's approval

- 24/7 physician response – where a phone call is insufficient in an emergency, a physician can be dispatched to a Team Members location
- Medical escort – appropriate clinical staff can be dispatched to return a Team Member from travels with medical assistance on a commercial flight.
- Medical case monitoring – Global Guardian physicians can remotely liaise with the physician providing care on the ground in the Team Members location of travel
- Repatriation of mortal remains

Travel Medical Insurance

Cigna International Medical Benefits Abroad Insurance Policy covers urgent and emergency medical expenses for Team Members traveling on company business. Treatment is facilitated through Global Guardian

On-Demand Security Services

The following specialist security services can be provided at additional cost when approved by Hilton.

- Close protection security personnel
- Secured airport transfers and vetted drivers in armored or non-armored vehicles
- Route planning and pre-trip preparations

Emergency Response Services

In-person specialist assistance (Hilton approval required) with emergency situations such as:

- acts or threats of violence,
- personal health issues,
- vehicular accidents,
- political or social instability, and
- natural disasters

Travel Services

- Legal referrals
- Emergency message transmission
- Translations and interpreters
- Lost document advice
- Ground transportation and accommodations for accompanying family members during a medical incident
- Emergency personal cash advances

Team Members should contact Global Guardian immediately for any of the above situations. Global Guardian will facilitate any medical treatment/security evacuation through our policy providers. This ensures Team Members do not complete lengthy claims processes or cover treatment costs.

Other websites that provide valuable information include regional Consular websites for the country you are visiting and your home country foreign office/embassy.

ii) RESEARCH ON COUNTRY/REGION/AREA

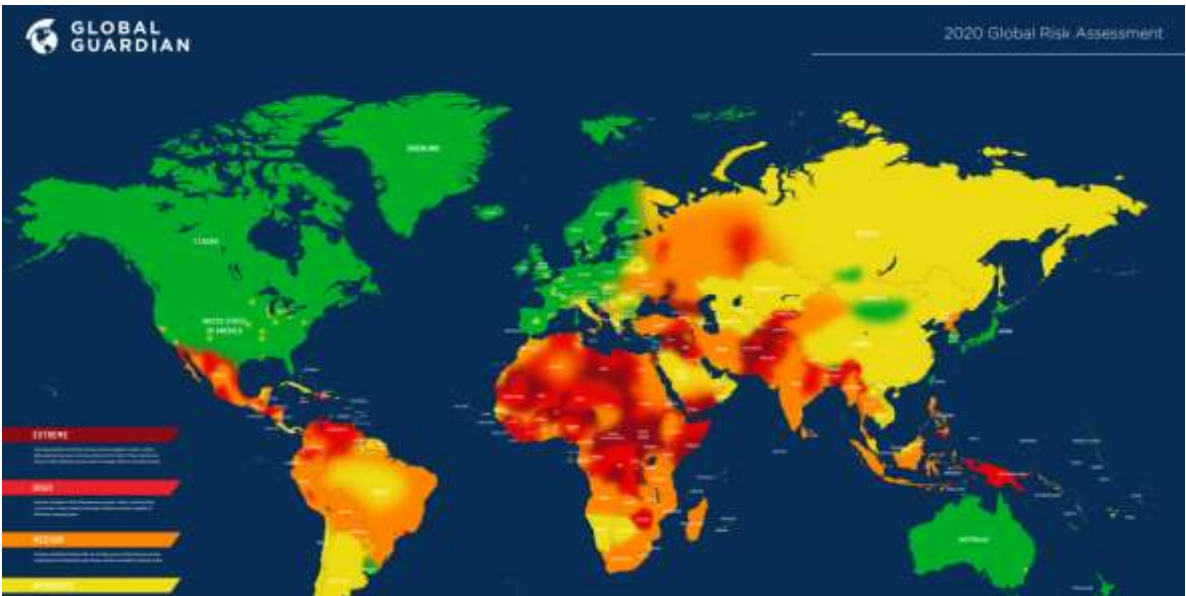

Once your travel plans are formalized, you are required to log onto the travel portal and research the country, region and exact location where you will stay.

Example – Nigeria Travel and Security Advice Search

Users are provided an overview of medical and safety and security travel risks. The travel advice tab provides detailed information on any regional security and medical issues. Further information can be provided by the Global Guardian Operations Center.

Risk Map

REGION
CATEGORY

Hilton operates a colour-coded system to advise on the security-based safety of travel to different regions and countries. Information on risk ratings for countries can be viewed under the Travel Safety and Security section of the travel portal or mobile app.

RED **High and Extreme Risk:** Countries or territories rated at HIGH RISK have regular periods of political instability and associated problems of poor governance, including high levels of corruption and failed or failing institutions. There may be a high level of incidental risk to travelers and expatriates from terrorism, militancy or insurgency. Countries or territories areas rated at EXTREME RISK may be in a state of war, failed states, or states in which the government has lost control of significant portions of the country. Government control and law and order may be minimal or non-existent. There is a serious threat of violent targeted attacks against travelers and expatriates by terrorists, insurgents, sectarian, criminal or other extremist groups.

ORANGE **Medium Risk:** Countries or territories rated at MEDIUM RISK may experience periodic political unrest, violent protests insurgency, and sporadic acts of terrorism. Travelers and expatriates may also face a risk from communal, sectarian or racial violence. Violent crime rates are likely to impact on foreigners as well as the local population.

YELLOW **Low Risk:** Countries or territories classified at LOW RISK are generally secure and the authorities maintain adequate security and emergency services and sound infrastructure. They have low violent crime rates and are generally free of racial, sectarian or political violence or civil unrest. Terrorist or militant organizations typically have limited capabilities and significant attacks affecting business travelers directly are infrequent.

Global Guardian App: This provides comprehensive information on travel alerts, advice, country information and security/medical data for your destination on your mobile device.

B) American
Express
Global

The Global Travel & Expense Policy (HWI-HSM-001) provides details when booking travel. You should use the preferred in country agency **or** Concur online booking tool where available. Hilton has additional travel

Business Travel, Travel Tracker insurance when the corporate American Express (AMEX) card is used for all bookings. By using AMEX, only approved airlines are used in the booking processes.
The following site provides details of airlines banned from operating in Europe:
http://ec.europa.eu/transport/modes/air/safety/air-ban/index_en.htm.

The following site lists airlines banned from operating in the United States (http://www.1001crash.com/index-page-liste_noire-lq-2.html).

Further basic airline safety information can also be found at <https://www.airlinerratings.com/airline-ratings/>

By using AMEX/Concur/Authorised Travel Agents, all reservations are linked to the Global Guardian Travel Tracking system.. When travel is booked for the Team Member by a corporate client, full details (e.g., airline carrier, departure/arrival locations, times, accommodations, etc.) must be logged with the line manager. The Team Member traveling must confirm the airline booked is accepted by American Express and verified as an approved carrier.

For Team Members not able to book via the designated travel management company or online booking system, department heads will need to ensure each Team Member has registered the full details of their trip with their line manager. This information must be sent to Global Guardian (operationscenter@globalguardian.com) who will then manually ingest your schedule into the Travel Management Portal.

For all other travelers using the Concur online booking system, those with smart phones must use the Global Guardian app's mobile check-in. Travelers must press the "Mobile Check-In" button for all High and Medium risk locations to record their safe arrival, which automatically logs the arrival point on the system. This feature can also be used during the business trip to log safe arrival to other destinations (e.g., hotel, airport).

Hilton’s Emergency Operations Center are able to access the Travel Management Portal which provides:

- A consolidated view of travel information alongside current health and security threats and risks ratings
- Search capabilities to quickly identify needed information
- Interactive maps, including risk maps, showing traveller location by continent, country and city
- Travellers’ flight, hotel, car rental and contact information in one snapshot
- Travelers real-time current location based upon use of the optional tracking feature
- Functionality to add and edit traveller data manually without engaging external travel agencies

The Corporate Safety and Security department monitors all high-risk travel itineraries to ensure that schedules are risk assessed.

C) Safety Measures

Pre-Trip Advisory:

After booking via Concur or other approved travel agent, contact will be established with all travellers to high risk locations to ensure:

- High risk travel has been risk assessed and authorized by line manager
- Any necessary additional security measures have been implemented
- The Global Guardian mobile app has been downloaded and tracking turned on for duration of travel
- The Travel Safety eLearning course has been completed prior to the trip

Tracking, Active Monitoring and Panic Alarms

It is advised when traveling to medium and high risk locations, to include new territories, that you activate the tracking function on your Global Guardian mobile app. (see below) This feature sends a continuous beacon from your mobile device to the Global Guardian monitoring center so they know exactly where you are. This is an opt out feature and is fully under your control.

Should you need emergency assistance due to a medical or security incident, there is also a panic alarm button on the app (see below) Once pressed (press and hold for 3 seconds) this immediately goes to the Global Guardian monitoring center who will activate the appropriate response protocols.

Travel Alerts

Through Hilton’s partnership with Global Guardian, travelers will receive travel alerts based on their current location and any locations present in their upcoming itineraries. In the event of a major incident such as a natural disaster or terrorist attack, you will automatically receive an alert in your Global Guardian app providing you with initial information and advice. The tracking capabilities provided via Global Guardian will allow us to locate any Team Members who are in the vicinity of a threat and reach out to them directly to ensure their safety.

**D) Modes of
Transport and
Accommodation**

a) General

For high- and medium-risk locations, pre-arranged travel must be provided through approved channels (e.g. via hotel-approved transport vendors). Regional Directors of Safety and Security can provide additional advice on transport in high-risk locations. Depending on area and status, additional provisions will be made for escorts and vehicle, considered on a case-by-case basis. Non-organized transport (e.g., local taxis off the street, Uber) should not be used. (Reference your Regional Finance Travel Policy guidance on vehicle choice.)

Long distance trains (including overnight) should not be used in high-risk regions. For medium- and low-risk regions, confirm routes and times, ensure your cabin and luggage can be secured from unauthorized access and carry a personal attack alarm that is provided via a Hilton Supply Management-approved vendor.

For low-risk regions, confirm transport (e.g., licensed taxi (not taxi bikes), trains, etc.) before you travel.

Rental Cars – Only AMEX-/Concur-approved vendors can be used. Rental cars should not be used by Team Members arriving off long-haul flights greater than 8 hours or flights that contribute to jetlag. Team Members are encouraged to arrange a hotel car or taxi and collect a rental vehicle after resting. Car rental navigation devices must be built in or securely mounted.

If you have any concerns about your travel and/or need additional information, contact Safety and Security as far in advance as possible. Additional information can be obtained from the Global Guardian Operations center by speaking directly with their security or medical advisors. Call center numbers are on the App.

b) Flights for Executive Travel

As part of Hilton's Business Resilience programme, department heads must conduct risk assessments when significant numbers (i.e., more than 10) from the same department/business unit are traveling to the same airport. This ensures, should there be a disaster, the business impact is minimal. The APAC Executive must register travel plans with the region's lead executive assistant to ensure Executives are not all on the same flight. Please try to arrange meeting locations where airports have multiple flight times and carriers. Area Presidents can share a flight with a maximum of 2 further Executives.

c) Accommodation

Hotel accommodation, no matter if you are staying at a Hilton property, must be booked via Concur or the Hilton App if Concur is unavailable. You are not permitted to book competitors' short-term rentals for business travel. Internal meetings using a Personalised Online Group (POG) for Team Member accommodation are acceptable in absence of Concur/Honors App.

E) Safety & Security Support	Safety and Security provides detailed intelligence and advice directly to travelers to certain medium- and all high-risk locations.
F) High Risk Travel Preparations	The corporate Safety and Security department monitors all itineraries involving travel to high risk locations. In the event of a high-risk location itinerary being scheduled, the corporate Safety and Security department will assess the itinerary and follow up with the traveler to ensure all appropriate precautions and arrangements are in place.
Social Activities	Each department head is responsible for their Team Members' safety and security. The safety of organized social activities and after work events must be considered and evaluated.
Delayed and Cancelled Flights	In the event of delayed or cancelled flights, the traveler is not permitted to accept airline or ad hoc transport services in Medium- or High-risk locations. The traveler must contact the nearest Hilton property for secure transport. If in an area where Hilton is not currently operating, call Global Guardian for assistance via the button on the App. Global Guardian will provide recommendations and referral to vetted providers.
Fitness to Travel	Each Team Member must ensure he/she is medically fit to travel. Should the traveler have any concerns, the traveler should consult his/her general practitioner.
Medical Information and Vaccination	Global Guardian provides a comprehensive medical assistance program for any emergency or accident that occurs during international business travel. You can find simple vaccination and medical risk advice in the country profile section of the app or travel portal. If you require more in depth medical and health information on your country of travel, the Global Guardian Operations Center will be happy to assist. As part of pre-travel plans, reference information regarding vaccinations, and ensure correct immunizations and boosters are up to date. The World Health Organization provides additional, country-specific health information: www.who.org.
Training	All Team Members who travel internationally should complete the Travel Safety eLearning course in Hilton University (1144476) prior to their trip.

Translation Support

Global Guardian can provide emergency translation support to business travelers. Contact the Global Guardian via the App if you need this service during travel.

Human Resources

This policy has been provided for our Team Members' safety and security. Team Members who fail to follow the policy and procedures listed in this document may be subject to disciplinary action.

Emergency Evacuation Plans

In the situation a traveler needs a medical and/or security emergency evacuation plan, call the emergency assistance number located in the Global Guardian mobile application under 'call operations center', or using the below numbers:

United States: (703) 485-2999
United Kingdom +44 (20) 3827-7779
Singapore +65 6971-6262

Medical Evacuation

Medical evacuations vary by the Team Member's location and condition, and resources needed.

Generally speaking, if a Team Member experiences medical issues while abroad, Global Guardian will refer the Team Member to vetted local health care facilities and maintain contact throughout to ensure the Team Member receives all necessary care. Global Guardian will make the necessary insurance arrangements to handle costs wherever possible. In the rare circumstance in which a medical evacuation is required, the following process will occur:

1. Global Guardian will hold an emergency conference call with Hilton Authorized Persons to agree on the best options for evacuating the Team Member.
2. Global Guardian will liaise with relevant insurers to cover the costs of evacuation
3. Global Guardian will schedule an evacuation at the earliest opportunity by either flying the TM home on a commercial flight accompanied by a clinician, or where necessary by flying them home in a dedicated medical evacuation plane.

Security Evacuation

Generally speaking, if a Team Member experiences security issues while abroad, Global Guardian can assist remotely via the operations center to provide advice and guidance. Where a serious security situation occurs such as major civil unrest or a natural disaster, Global Guardian can mobilize on the ground teams to conduct reconnaissance and determine what means are available for evacuation. Each situation is unique and the Global Guardian operations center will hold an emergency conference call with Hilton Corporate Safety and Security to decide together on the best options for getting the Team Member to safety. These options may include:

1. Dispatching a team to meet and secure the Team Member and relocate them to a safe location such as their hotel.
2. Evacuating the Team Member altogether by making all necessary emergency transportation and paperwork arrangements and transporting the Team Member to a border or airport for safe onward travel.
